EXPERIMENT 3

The stakeholders have conflicting views on the user interface design for an E-Commerce mobile app. Create a prototype using Figma tool to discuss with the stakeholders to get their feedback and approval.

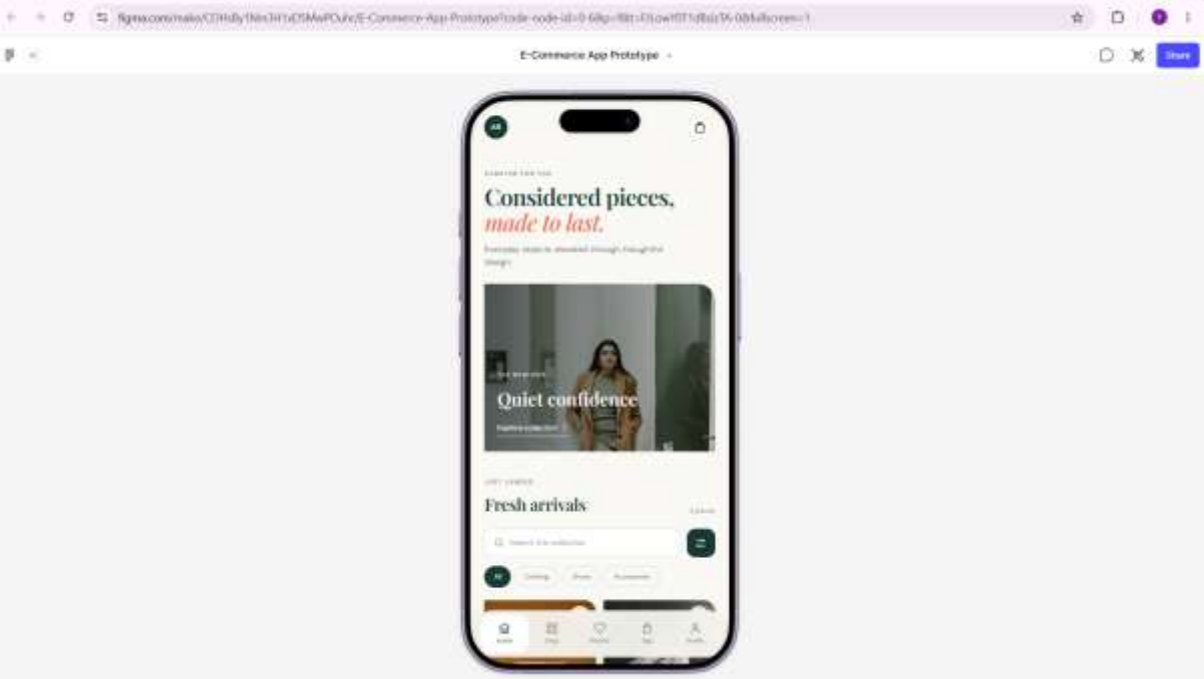

1.AIM

To create an interactive prototype of an E-Commerce mobile application using Figma to present the user interface design to stakeholders, collect their feedback, resolve design conflicts, and obtain approval**.**

2. PROCEDURE

1. Open the Figma website (www.figma.com) and log in to your account.
2. Create a new design file and select a mobile screen frame.
3. Design the Home Page with a search bar, product categories, banners, and featured products.
4. Design the Product Listing Page to display products with images, names, and prices.
5. Create a Product Details Page with product descriptions, ratings, prices, and an Add to Cart button.
6. Design the Shopping Cart Page to display selected products and total price.
7. Create a Checkout Page with delivery address and payment options.
8. Connect all the screens using the Prototype option in Figma.
9. Share the prototype link with stakeholders and collect their feedback about the design, layout, colours, and navigation.
10. Make the necessary changes based on stakeholder feedback and obtain final approval.

OUTPUT

RESULT

Thus, an interactive E-Commerce mobile application prototype was successfully created using Figma. The prototype was presented to stakeholders to collect feedback and identify design improvements. Based on their suggestions, the necessary changes were made, helping to resolve design conflicts and obtain stakeholder approval.
