EXPERIMENT 5

Use the following requirements for a Library Management System:

□ Add a feature to search books by title and author.

□ Implement an online book reservation system.

□ Generate monthly reports on borrowed books for administrators.

□ Enable email notifications for overdue books.

□ Add support for QR code scanning for borrowing and returning books.

□ Create a user-friendly dashboard for librarians.

□ Allow users to review and rate books.

□ Integrate a chatbot for user assistance.

□ Develop a mobile app version of the system.

□ Provide multi-language support. Categorize each requirement using MOSCOW Method (Must-Have, Should-Have, Could-Have, or Won't-Have) based on the following criteria:

□ Impact on the users and stakeholders.

□ Feasibility considering time, budget, and resource constraints. Finally Submit the completed Google Sheet or Excel file with all requirements categorized and justified.

AIM

To identify and prioritize the requirements of a Library Management System using the MoSCoW method (Must-Have, Should-Have, Could-Have, and Won't-Have) based on user impact, stakeholder needs, feasibility, time, budget, and available resources.

2. PROCEDURE

1. List all 10 requirements of the Library Management System.
2. Open Microsoft Excel or Google Sheets and create a new spreadsheet.
3. Create columns for S.No, Requirement, MoSCoW Category, User Impact, Feasibility, and Justification.
4. Enter all 10 requirements into the spreadsheet.

5. Categorize each requirement into one of the four MoSCoW categories:
    - Must-Have: Essential features required for the system.
    - Should-Have: Important features that improve system functionality.
    - Could-Have: Additional features that provide extra benefits.
    - Won't-Have: Features postponed for future development.
6. Evaluate each requirement based on its impact on users and stakeholders.
7. Analyze the feasibility of each requirement considering development time, budget, and available resources.
8. Provide a suitable justification for each category.
9. Review the completed spreadsheet and ensure all requirements are properly categorized.
10. Save the completed Excel file or upload it to Google Sheets for submission.

OUTPUT
